## WORK EXPERIENCE

### 3D Artist/UI Designer Amara Design Oct 2020 - Present

- Designed graphics and created 3D designs of interiors and furniture.
- Designed UI for company's sibling company Lets Travel using HTML, CSS. The design was created keeping in mind people who love to travel. Used high impact imagery designed in Photoshop and followed the principle of keeping it simple in order to lure customers. Ease in accessibility was provided **to minimize bounce rate for a company**.
- Created 3D designs of furniture and interiors for Abstraction Interiors and Furniture Artists between July 2020 and Sep 2020.

## PROJECTS

### UX/UI Design Kitchen Knight Feb 2022

- An app for food seekers and surplus food owners to prevent food wastage. In broader spectrum of **design thinking** shared my contribution in **Empathizing, Define, Ideate and Prototype**. Designed logo, user personas, proposed design patterns, built user flows, mockups, low-fidelity wireframes and UI designs.

### UX/UI Design Tea Zone Jan 2022

- An app in which user can buy tea from near tea vendors. target users were from corporate offices to home kitchen as well. Performed **Quantitative Research, Design Documentation** (Design Pattern and Information Architecture) and **UI design**.

### UX/Ui Design Easy-Way Dec 2021

- An App in which users can scan medicines on prescription and read more about it. Designed UI which covered maximum principles of **UCD (user centric design)**, qualitative user research was performed.

### Web/UI Design Auto-pay July 2021 – Aug 2021

- A UI mock for a digital wallet website. **Created a simple and minimalist design** of the. Efficiently used Photoshop to create the landing page's layout. Converted PSD with the help of HTML & Vanilla CSS. Created the company's logo using Photoshop.
- Built user friendly UI with navigation bar having big, round icons suiting all age group of users. Provided image cards with more appealing details. CSS animation applied to the banner images to give **carousel effect**. Optimized layout by covering key features briefly to prevent scroll by the user.

### Web/UI Design Joy-Box July 2021

- Created a user-friendly design in Figma for an e-commerce website Joy-Box. The created design featured simple color combination which was a partial prototype in Figma. Used 2D animation GIF in the layout which was created using After Effects. Created the logo in Illustrator and Photoshop.
- Utilized media queries** to make its mobile version and iPad version. Used CSS for animation, create navigation dropdown, give hover. Used pseudo elements to create cart notification and section backgrounds. Saved user scrolls and click by utilizing Scroll spy effect. Used jQuery for Sign up alerts.

### Web/UI Design Zealicious Apr 2021 - May 2021

- Designed for Zealicious restaurant. Logo was created for the website using Photoshop.
- Simple web layout designed using HTML, CSS, and Bootstrap. Responsive web layout created for users of all age groups.
- Unique navbar with animation and transition effect for booking option were created. Color changes for the button on hovering were configured for user attention. Created transitional hero images on hover and used pseudo elements in borders for better UX.
